ACCORDING TO OUR CLIENTS

"It was a great experience working with Proweb towards the redevelopment of our Website.

They bring many things to the table. Their design skills, communication and openness to solving problems are all valuable traits.

I would highly recommend Makafui and his team for their design, development and inter-personal skills.

I am confident that they would achieve above and beyond expectations going forward"

Nana Opoku Osei-Sraha

*Deputy IT Manager
GIMPA*

"We have used Proweb for all our websites for several years now, and recommend them without reservation. The team is very talented and knowledgeable and deliver on their promises and our vision every time.

Consummate problem-solvers and professionals, they are very open to mocking up several options and incorporating all of our requests and suggestions.

They return calls and emails straightaway, complete projects on or ahead of schedule, and are prompt, patient and precise with any changes we request along the way. Thank you, Proweb!"

Alena Herklotz

*Senior Fellow, SDLI
& Executive Director, Summer Programs
Leitner Center for International Law & Justice*

"Proweb solutions was selected to upgrade United Nations Population Fund (UNFPA) Ghana office website

They also assumed the primary responsibilities of maintaining overall quality and ensuring proper website functioning

The innovations and dynamism made our website aesthetically praiseworthy such that the UNFPA Sierra Leone Country office sought their services through us.

We find them to be a reliable and efficient service provider."

Doris Mawuse Aglobitse, PhD

*National Programme Analyst
Communication & Res. Mobilization
United Nations Population Fund
Accra, Ghana*

ACCORDING TO OUR CLIENTS

“As webmaster of the Electoral Commission of Ghana I have dealt with Proweb Solutions Ltd since 2012.

They have provided the Commission with excellent support in the areas of website engineering, site optimization, search engine analysis, hosting.

Their work has been a major factor in our website's success, helping it to become one of the most visited resources of its kind on the Internet.”

Edinam Dzah

Web Master
Electoral Commission of Ghana

“Thanks to Makafui and the team at Proweb Solutions, we have recently launched our fantastic new website. Not only are we delighted with the results but we have received some extremely positive feedback from partners in the population and development sector.

Throughout the process of delivering the site, Makafui has been on hand to listen and understand our requirements and also offer his expertise and experience to the project. He made the whole process manageable and clear and most importantly delivered everything on time and to budget.

I cannot recommend working with Proweb Solutions enough and I am excited about their responsive support services.”

Esther Cofie (Ms.)

Ag. Dir. Tech Services
for Ag. Executive Director

“Proweb Solutions is owned and operated by Makafui Kuenyehia whose knowledge of various software solutions is overwhelming. We have procured various security products from Proweb and have referred several companies to Makafui, and there has not yet been a solution or service he has not delivered on. Moreover, we have received nothing but positive feedback concerning his services. All of our experience during our four-year association with Proweb Solutions has been positive, and to our knowledge this company has the history of timely and successful completion of its jobs

I would have no hesitation in recommending Proweb to anyone who requires their services.”

Derek Akompi

Head, Systems & Infrastructure
ICT, Ministry of Finance

CASE STUDIES

Web, Intranet & Hosting / Internal Audit Agency (IAA)

The first part of the assignment involved the Identification, Analysis and Evaluation of the Business and Management Information System requirement of the client.

A Website based on the Microsoft Dot Net Platform Was developed. It was made up of Microsoft SQL Database 2005 on a windows 2003 server platform with .NET 3.0 and extensive email components. An intranet portal based on SharePoint 2007 was developed and integrated to the company network and made accessible remotely for ease of collaboration, document sharing and workflow.

We were contacted by the Country office of the Action Aid to propose for the development of an M & E System that will help collate data, analyze and report on projects throughout Ghana.

After winning the bid through competitive tendering, Proweb developed a web-based software platform that streamline results-based management and monitoring and evaluation (M&E) of AAG projects. The tool help capture, track, manage and report on development interventions using sound performance indicator data.

The tool enabled AAG to improve the effectiveness, timeliness and accuracy of results management from start to finish.

CASE STUDIES

Website Development, Hosting and Support / UNFPA Sierra Leone

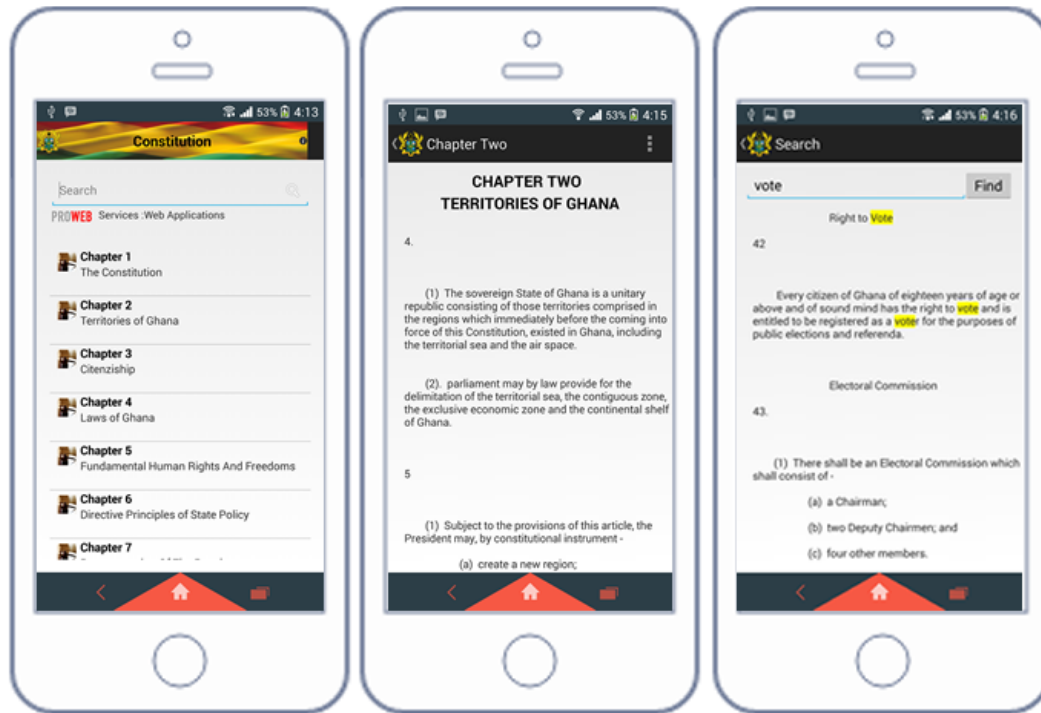

We were contacted by the Country office of the UNFPA in Sierra Leone having seen the impressive design of the country office of Ghana.

The UNFPA had mandated all country offices to develop comprehensive web portals to showcase their activities and programs.

We managed to develop the website in under 1 month, host it and train the resource persons on the management and update of the website completely without having to send personnel over to Sierra Leone as the agency was under tight budget and schedule.

CASE STUDIES

Mobile App Competency / People of Ghana

We ventured into the mobile application development space with our first proof of concept app for the general public.

A searchable Android based Constitution of the Republic of Ghana.

This application provides the user the opportunity to search for certain keywords within the constitution and is provided with the list of sections and chapters that hold the information required making it easier to use and find relevant information easily.

CASE STUDIES

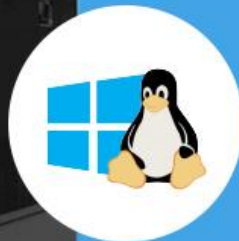

WEB HOSTING AND SUPPORT / GOV OF GHANA

The Ministry of Information's website is the Mouth Piece of Government on the Internet. As such, there is high request for pages which translates into huge bandwidth consumption on a monthly basis. Consuming no less than 60gigabytes of data monthly, the previous local ISP hosting the website could not handle the traffic which led to the website going down periodically.

PROWEB Solutions was contacted by the Ghana Information Communication Directorate to Setup up hosting space and upload files to Host and Support the Ministry's web presence.

As a norm, PROWEB lived up to its expectations presenting the Ministry with its Cluster server technology that handled the website with no interruptions till it was handed over to the newly created authority, National Information Technology Authority (NITA).

We are happy to have powered the Ghana Government Official Website for 2years (www.ghana.gov.gh)

VPS Hosting

- ✓ Guaranteed Resources
- ✓ Host Unlimited Domains
- ✓ Root/RDP Access
- ✓ Free Setup/Free Support
